## Three reasons every partner should be at Sage Summit 2012.

[Registration Details](#)

Sage Summit 2012 is eight months away, but the anticipation is already building. Here are three reasons why attending should top your list of priorities for this year:

### 1. Get the scoop on trending topics.

By popular request, we're expanding our Expert Series workshops, featuring industry experts and authors, plus you'll have the opportunity to attend two workshops instead of one. We also want to hear from you and your clients. Tell us your success story, share a best practice, or simply tell us what topics you want to hear about. [Tell us about it.](#)

### 2. Enhanced learning tracks, sessions, and labs...with something for everyone.

You asked us to update the content, retire outdated sessions, and invigorate the overall learning experience. We listened, and we're delivering. New learning tracks make it easier to find sessions that relate to your areas of interest and your role. You'll also find more hands-on labs and a better balance of sessions that cater to power users and product veterans. [Learn about the new tracks.](#)

### 3. See what's new. Sage Summit is your cloud headquarters.

Like no place else, Sage Summit gives you the opportunity to see and touch new technologies from Sage and our development partners. Cloud solutions. Connected services. Product releases. Integrated applications. Feature enhancements. If you want to be in the know, you'll want to be at Sage Summit.
