

DATENBLATT

QBuild CADLink

Link your CAD programm to your ERP business solution.

Complementary Solutions

Create a competitive advantage for your business by implementing customized and integrated Sage X3 solutions. Discover the array of possibilities Sage X3 complementary solutions offer to match your specific needs.

QBuild CADLink directly links any CAD program to Sage X3, ensuring you have accurate and up-to-date BOMs at all times. CADLink eliminates duplicate data entry, frees engineers' time, boosts overall accuracy, and leads to less scrap, more on-time shipments, and a rapid return on investment.

Benefits

- Automated data transfer eliminates time-consuming duplicate data entry
- Direct integration eliminates clerical errors and increases accuracy
- Free engineering resources to focus on value-added tasks
- Increase on time shipments through faster production cycles
- Reduce scrap through fewer errors and data validation
- Improve documentation and communication with change summary report
- Boost purchasing accuracy through access to up-to-date component data
- Minimal IT impact – no additional server or database components
- Increase the speed of data flow from sales to engineering, purchasing, and production
- Boost product quality with accurate BOM data in your ERP
- Collaboration benefits from having a single version of engineering data
- Rapid ROI – the typical payback is less than 3 months

Features

- Directly integrates Sage X3 with the CAD, PDM, and PLM of your choice
- Real time, two-way data synchronization
- Updates products, product sites, and production BOMs in Enterprise Management* directly from the CAD
- Highly visual and intuitive interface displays BOM changes and data discrepancies
- Color-coded, side-by-side comparison of BOM data and discrepancies
- Generate one-click BOM change summary report
- Automatic data validation and error notification
- Direct PDM/Vault integration available
- Direct PLM integration available

Availability

- North America
