Sage Intelligence Reporting for Enterprise Management

*Easily control, automate and analyze
data to make more informed business
decisions.*

Save time. Take control. Take action.

“Sage Enterprise Management and Sage Intelligence will pay for themselves through the efficiencies we gain.” - Tim Waros, Financial Analyst, County Commissioners Association of Pennsylvania

Every business is unique and because of this, so are their financial reporting requirements.

Sage Intelligence Reporting for Enterprise Management is an intuitive reporting solution that provides you with ready-to-use financial reports to start with, that you can then fully customize yourself to suit your business’s needs. Alternatively, you can create a new report from scratch to suit your unique requirements.

With Intelligence Reporting, you get a comprehensive and flexible financial reporting solution. It boasts an intuitive user interface to supplement a powerful generation engine utilizing the latest Sage Intelligence Report Designer In-Memory technology, allowing for improved performance and usability.

Key benefits for your business:

Save time. You only need to customize your reports once.

Take Control. Enjoy the freedom of easily customizing your financial reports to suit your unique business needs.

Take action. Use specific information to make smart business decisions and act on them.

Key Features

- 1. 100% Excel experience.** The familiar Excel interface leverages existing Excel skills and puts you in total control of formatting, making the design and maintenance of financial reports and financial packs much faster and easier.
- 2. Powerful In-Memory technology.** Report on large data volumes using formulas inside Excel.
- 3. Wizard to fast track financial layout generation.** If you are not familiar with Excel, you can use the Layout Generator to effortlessly generate standard financial reports.
- 4. Scalable reporting.** The solution supports multiple fiscal years as well as multiple charts of account, ledgers, companies, and sites, making scalable reporting accurate, faster, and easier.
- 5. Simple drill down.** A right-click drill down option within the Excel report extends accessibility and visibility into transactional information.
- 6. Complete control over the level of detail in reports.** Advanced Excel users can leverage row sets to define their own repository of reusable, customized reporting rows based on account rules using ranges, wildcards, and arithmetic to speed up report design and maintenance.
- 7. Integrated multicurrency support.** Multicurrency reporting is easy with access from within Excel to exchange rates maintained within Sage Enterprise Management.
- 8. Advanced dimensional filtering.** Report on both financial and analytical data in a single layout with dimensional Reporting Trees, which enable advanced dimensional filtering across all nine dimensions. You can recreate pyramids, combine dimension types, leverage powerful rollup capability, and slice and dice to get the most valuable information from your reports.
- 9. Automated Report Distribution.** In a variety of standard formats, send reports to a file, publish to an FTP site, and send by email. Choose the reports you want to distribute and who will receive them and customize each email format using your existing MS Outlook profile and address book.

Why Intelligence Reporting?

Better decision making, improved efficiency and business growth are the top three reasons business owners use business intelligence.

You get the following **key components** with Intelligence Reporting that will help you succeed.

Report Viewer. The Report Viewer allows you to run out the relevant reports. It comes with the basic filtering capabilities (filtering and changing of parameters) and drill-down functionality on existing reports.

Report Manager. The Report Manager allows you to author new reports (organizing, creating, and editing), filter and aggregate data, as well as create new reports with the standard data tables available. This tool also allows you to set permissions and security for reports.

Report Designer. This Excel add-in allows you to easily create and edit financial statements using a graphical "drag and drop" interface, giving you full control of your financial reports.

Connector module. The Connector module allows you to access and consolidate information from multiple sources. This means you can connect to more than one database at a time enabling you to do multicurrency or multicurrency consolidations and create new data containers for specific customized reports on any part of your Sage Business Solution and/or any other data sources (ODBC compliant).
