# THE THING KEEPING YOU ON YOUR CURRENT ACCOUNTING SOFTWARE ... ISN'T THE SOFTWARE.

The risk isn't switching. It's staying on a tool that doesn't meet your needs.

Most small business owners who stay on QuickBooks or Xero aren't staying because it's working. They're staying because switching sounds too risky: lost data, a learning curve, weeks of chaos. And suddenly, the tool you've outgrown becomes the tool you keep.

Sage Accounting is built for Canadian small businesses ready to stop working around their software. And getting here is simpler than you think.

## Why businesses switch

Sage Accounting gives Canadian small businesses things their current software doesn't.

**Unlimited users.** You shouldn't pay more just because more people need to see the books. QuickBooks charges per seat. Sage doesn't.

**Automated receipt capture.** Unlimited uploads via photo, drag-and-drop, or email. Expenses get logged without manual entry.

**Payroll that actually connects.** Buy it as a bundle, toggle it on, and your financial data flows between products without re-entering anything.

**Plans that cost less.** Sage Accounting tiers are priced below QuickBooks and Xero, without cutting the features growing businesses need. Plus, our trusted partner, Movemybooks, will transfer two years of data for free (a \$100 value).

**Current Xero customer?**

Sage

# The fears, dissolved

**“I’ll lose my data.”** You won’t! Through Move My Books, Sage migrates up to two years of your financial data, free. That’s about \$100 in time + cost savings. But peace of mind = priceless.

**“It’ll take forever to set up.”** Most businesses are up and running in a day. The interface is clean, the onboarding is guided, and support is there when you need it.

**“I’ll have to retrain everyone.”** Sage Accounting includes unlimited users on Standard and Plus plans, and you’ll get valuable onboarding support along the way. Bring in your bookkeeper, your accountant, your business partner. No extra seat fees (QuickBooks can’t say that).

**“What if I get stuck?”** You get a real support team, in English and in French, ready to help.

## Built for Canada. Both official languages.

One in five Canadians speaks French as a first language. Xero hasn’t noticed. Sage Accounting is available in French and English, with bilingual customer support.

You’ve been ready longer than you think. The only thing left is the first step.

## Contacting Sage Support is like a...

Contacting Sage Support is like a miracle cure.

Their knowledge and efficiency in handling queries/issues knows no bounds. I have never been let down.

**“Switching will cost me.”** The migration is covered. And Sage Accounting plans start lower than what you’re likely paying now.

## With Sage Accounting, you get:

Unlimited users. Bilingual support. Automated receipt capture. Connected payroll. Plans priced below QuickBooks and Xero. And a free migration that brings two years of your data with you.
