Why Choose Sage UBS?

Award-winning solution

2019 Winner of Frost and Sullivan Malaysia Financial Accounting Software vendor of the year.

Trusted by more than 500k SMEs in Malaysia

Over 500,000 SMEs in Malaysia have implemented Sage UBS

Established and industry-acclaimed

Household name with over 30 years' experience serving SMEs in Malaysia.

SST-compliant

100% compliant hassle-free filing of tax returns with constant updates with constant updates and upgrades e.g. from GST to SST.

Increase your productivity

Increase your productivity with streamlined accounting, inventory and billing management.

Features and benefits

Quick entry

Key in only one side of the transaction and the corresponding side will be automatically handled by the system.

Setup wizard

Sage UBS Setup and Transaction Wizards allows the first-time user to be up and running in moments.

Remote access

In-built mobile license allows you to work when, where and how you want.

Data management

Easily secure your data with our enhanced scheduled back-up functionality.

Cashflow management

Automate reconciliation with ready-to-use bank formats to easily submit payment files to your bank.

Accounting management

Easy and fast management of General Ledger, Debtors and Creditors

Multi-company & multi-currency

Maintain accounts of multiple companies under a single view. Transact in any currency you wish and view foreign currency transactions in your home currency.

Fixed assets

Configure asset codes with appropriate handling of depreciation by the depreciation method selected, disposal, write-offs and more.

Budget management

Tracks original estimates of costs, revenues and resources over a specific period.

Billing management

Reduce errors with integrated sales and billing processes.

Tax calculation

Manage tax-related processing for all transactions (sales and purchases) and reporting in the system.

Financial reporting

Track and generate insights on all financial activities across your business.

Audit trail

Track changes made to any transaction with login ID, date, time, user information and images of changes.

User management

Multiple tools for easy user management of user logins.

Transaction management

Tools that give greater control of your business and help minimise errors and adjustments.

Goods received notes

View, sort and group the goods that you have received.

Price management

Configure different pricing schemes for different goods and customers at any point.

Inventory management

Complete integration with finance and operations. Access real-time information related to product and stock levels across multiple locations.

Barcode management

Our barcode feature easily and seamlessly inputs price and inventory information direct into UBS.

Bill of materials (BOM)

Easily manage raw materials, sub-assemblies, intermediate assemblies, sub-components, components and parts.
