

SUCCESS STORY IN FOCUS

# Woodenbridge and Sage 100 craft secure, remote ERP access

*Cabinet design firm pivots to the cloud to empower remote workforce with hosted ERP model*

Company  
**Woodenbridge**  
Location  
**California, US**

Industry  
**Discrete Manufacturing**  
Sage Products  
**Sage 100**

“With Sage 100 in the cloud, I can focus more of my attention on the financial side of the business and less on the IT side. Our partner, Millennium Accounting Solutions, took less than a day to migrate Woodenbridge from Sage 100 on premise to Sage Partner Cloud. I don’t recall any down time.”

David Coburn, CFO and Owner, Woodenbridge

### The company:

Woodenbridge is a premier custom cabinet designer and builder that has been transforming high end residential and commercial properties since 2002.

### The challenge:

When the coronavirus pandemic hit, the majority of Woodenbridge’s staff began working remotely. With no one in the office, the company’s Sage 100 server moved to the owner’s home — creating both a security risk and an accessibility challenge.

### The solution:

Having already successfully migrated another company over to Sage Partner Cloud, the CFO had to act quickly. By moving Sage 100 to the cloud, Woodenbridge employees can work productively from home, with improved network security and fewer time-consuming administrative tasks.

### The outcomes:

Working in the cloud allows the company to better support its remote workforce while freeing internal resources for more strategic tasks. This has been a game changer for the Woodenbridge team, helping to preserve business continuity during a challenging time.

- Supports a 100% remote operating model
- Migration took less than one day with zero downtime
- Automatic backups protect business data
- Frees internal resources for more value-added tasks

### About Sage 100

Sage 100 is a simple, flexible and connected end-to-end business management solution that can help manage your discrete manufacturing, wholesale distribution, and professional service processes. To learn more about cloud deployments, ask your partner about the [Sage Partner Cloud program](#)
