Sage

Software with the horsepower you need for construction

“An end-to-end cloud system that boosts efficiency across the business, from initial lead through project completion. I’ve been looking for this for 20 years.”

—Joe Murray, CEO, ACT Construction

With a legacy of leading construction technology, we understand the issues companies face today, and are poised to tackle the challenges of tomorrow.

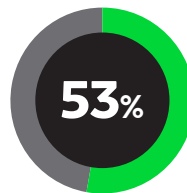

Sage offers a complete cloud-native construction suite with preconstruction, operations, and financial management solutions, plus integrations with other popular software so you can work more efficiently and scale your business.

Coupled with our trusted partner network — the largest and most experienced in the construction industry — you can feel confident you’re choosing a software solution that delivers the critical capabilities, flexibility, and support you need to thrive.

Innovation fueled by experience

“I’d recommend Sage for companies in the construction space that want to have best-in-class technology.”

—Thomas Cochran, CFO, Orion Companies

Built for the cloud and constantly evolving

Sage has over 20 years of experience as a pioneer in cloud financials. Our construction-specific solutions were born in the cloud and continue to lead the industry with cutting-edge technology such as artificial intelligence and machine learning. While other vendors talk about the future of AI on their roadmap, we’re leading the charge and already delivering.

- Digital connections and open APIs provide flexibility for construction companies that rely on a wide range of systems to run their business.
- Our multi-tenant true cloud foundation means you’ll never have to worry about being on the latest version of our software or deal with complicated and expensive upgrades.
- We have the key framework in place that allows artificial intelligence and machine learning to provide speed, accuracy, and insights — taking your business and team capabilities to the next level.

Sage

Preconstruction

Exceptional projects start with a solid foundation. Accelerate estimating, streamline bid management, and reduce risk with Sage preconstruction solutions. Whether you're tracking new opportunities, building detailed estimates, leveling subcontractor bids, or preparing for construction, Sage gives you the tools to move from bid to build with greater speed, accuracy, and confidence.

- **Optimize your sales strategy** and forecast revenue potential with centralized lead and opportunity tracking.
- **Improve estimate accuracy** with AI-powered takeoff, estimating, and bid insight tools.
- **Simplify bid day** with cloud-based bid leveling, subcontractor selection, and AI-assisted bid analysis.
- **Precisely plan and staff your jobs** and monitor all opportunities including related proposals, estimating, and bid activities.

“Sage Estimating gives us the confidence we need to tackle any project head-on, providing reliable solutions that other software simply can't match.”

—Jason Hyland, estimator,
Doran Contractors

Core preconstruction products

Sage Estimating

Smarter estimating software trusted by top construction companies for over 30 years. Sage Estimating helps teams build accurate estimates, level subcontractor bids, evaluate risk, and award work with confidence. With flexible estimating workflows, cloud-based bid leveling, AI-assisted bid insights, and takeoff integration, Sage Estimating helps improve accuracy, reduce manual work, and win more profitable projects.

eTakeoff Dimension

A powerful, AI-driven takeoff tool that accurately quantifies materials and quantities from project drawings, reducing manual errors and improving estimation accuracy.

Sage Construction Management

End-to-end construction management software with lead and opportunity tracking to help teams prioritize pursuits, manage activity, and improve visibility from preconstruction through execution.

Operations

Operational efficiency is the cornerstone of lasting success. Whether you're overseeing construction projects, coordinating field technicians, or managing properties, our operations-focused products will fuel your team and business.

- **Efficiently set up and manage projects** from contract to completion by connecting project teams, managing tasks, collaborating from any device, and keeping project documents and drawings organized in one place.
- **Streamline field-to-office communication** with mobile tools that enable field teams to focus on project excellence.
- **Increase productivity** by tracking and managing schedules, punch lists, project tasks, equipment, labor, deliveries, submittals, RFIs, work orders, and more.
- **Take control** of the complexities of property, lease, tenant, and unit management using real-time data.
- **Integrate easily** with construction operations tech leaders like Procore and build a proven tech stack that works for your business.

“I shopped a ton of construction software products. We did the pros and cons, and based on price and flexibility of the system, you can’t beat it.”

—Karen Regan, managing partner
WJ Regan and Company

Core operations products

Sage Construction Management

End-to-end software that handles every aspect of construction management, enabling you to deliver projects more efficiently, reduce risk, and maximize profitability.

Sage Intacct Real Estate

Cloud-based property management and accounting software designed to help you simplify processes and maximize net operating income.

Sage Field Operations

Software for service-based contractors that connects the field to the office, improving productivity with an up-to-date picture of crucial metrics like average repair time, technician utilization, and customer satisfaction.

Financial Management

Take control of the financial health of your business and projects and start making confident, data-driven decisions with industry-leading finance software. With features designed to meet the demands of construction, you can spend less time on administrative tasks and more time building.

- **Maximize profitability** with comprehensive job costing capabilities, and track all costs including labor, materials, equipment, subcontracts, and more.
- **Make financially sound decisions** with real-time visibility into data available anytime, anywhere, and from any device.
- **Simplify complex construction processes** like billing and payroll with tight integrations.
- **Increase efficiency and accuracy** with automated WIP management, eliminating the need to work in separate spreadsheets and allowing you to maintain cash flow and compliance.
- **Use Sage Ai to make faster, more informed decisions** by helping teams surface project performance trends, understand financial risks, and act with greater confidence while keeping people in control.

“Sage Intacct Construction has provided the accounting backbone we needed to build a more connected, efficient system. It’s been phenomenal.”

—Matt Andersen, CFO
Superior Masonry

Core finance products

Sage Intacct Construction

The first cloud-native financial management solution for the construction industry, providing real-time visibility into the financial health of your projects to make confident, data-driven decisions.

Sage 100 Contractor

An ideal step-up for small companies using Excel or other generic accounting software, this on-premises solution provides easy access to job cost and project management information.

Sage 300 Construction and Real Estate

Formerly known as Timberline, this longstanding on-premises product is the market leader in end-to-end construction finance and property management software.

HR + Payroll

Manage your workforce with connected HR and payroll solutions built for construction. Sage helps contractors streamline hiring, onboarding, payroll, compliance, labor tracking, and workforce management—while giving teams the flexibility to choose the solution that best fits their business.

Whether you need a comprehensive human capital management platform, payroll tightly integrated with your financials, or an outsourced solution, Sage delivers scalable options designed to support growing construction companies.

- **Centralize workforce management** with tools for recruiting, onboarding, benefits administration, time tracking, and employee development.
- **Improve payroll accuracy and compliance** with solutions built to handle certified payroll, multi-state labor requirements, union reporting, and complex construction pay rules.
- **Connect field and office operations** with real-time labor data that flows seamlessly into project costing and financial reporting.
- **Gain flexibility and choice** with integrated HR and payroll solutions tailored to different operational needs, business sizes, and growth stages.

“I'm really proud to say we don't have siloed software anymore, and Sage Intacct and Sage HCM were a huge part of that for us.”

—Amanda King Dalman, director of technology and training, PRG Group

Core HR + payroll products

Sage HCM

A unified HR and payroll solution built for construction. Sage HCM streamlines payroll, time tracking, onboarding, benefits, compliance, and workforce management while improving payroll accuracy and connecting labor data directly to projects and financials.

ADP Workforce Now for Construction

An outsourced HR and payroll solution that helps contractors simplify payroll processing, tax compliance, workforce management, and employee self-service with scalable cloud-based tools.

The power of choice and flexibility

Versatile integrations

While our end-to-end suite delivers the most complete solution on the market, we understand that software isn't one size fits all. That's why we're committed to being an open platform and continuing to grow our ecosystem of 200+ partner solutions — like Procore, Autodesk, and others — that integrate with the Sage construction suite.

Our priority is to provide the power of choice — the simplicity to choose Sage's all-in-one solution, and the flexibility to select the right mix of integrated products that makes sense for your business.

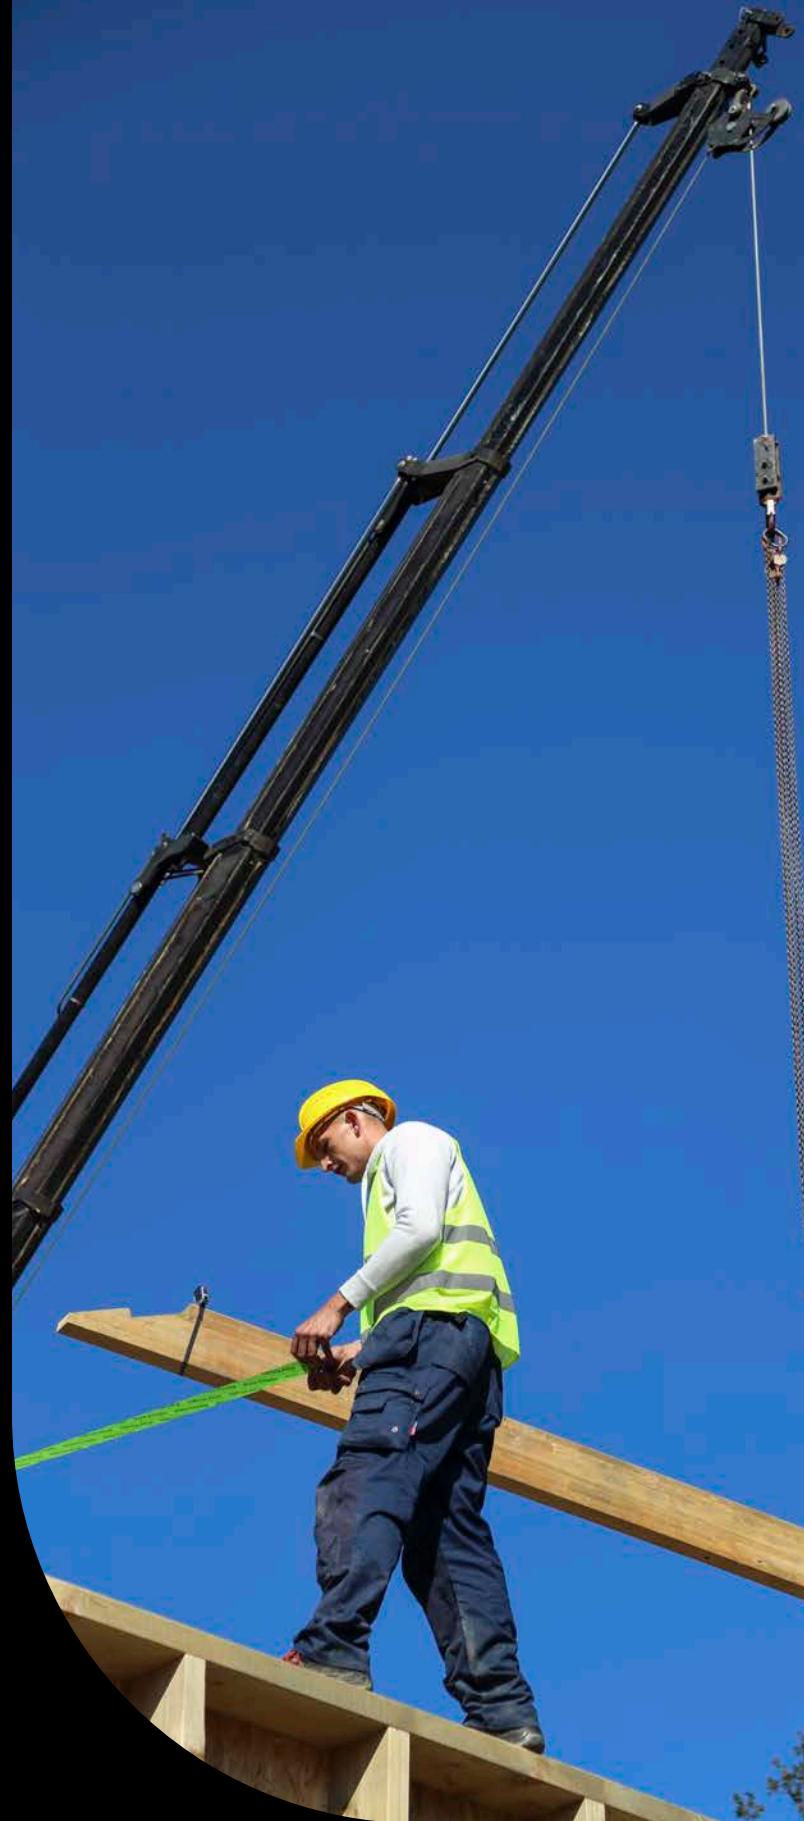

Add-ons that pack a punch

We're proud to offer an array of integrated add-on products so you can customize your solution even further. Below are just a few of the many add-ons available:

Sage Paperless for Construction: Integrated document management and accounts payable automation software that helps organizations capture, route, approve, and securely store business-critical documents.

Sage Expense Management: Card-agnostic expense software built to automate receipt collection, expense reporting, and credit card management.

Others: Sage Intacct Planning, Fixed Assets, Dynamic Allocations, Multi-entity and global consolidations, and Inventory.

Helping you grow, thrive, and exceed your goals

The industry's largest and most trusted partner network

We get it — taking the leap to invest in new software can feel overwhelming. Having a partner that understands how you do business is key to ensuring your success. We're proud to have built the largest and most experienced partner network in the construction industry, which means you'll have experts by your side during your software transition who have worked with companies just like you.

What makes our partners exceptional is their commitment to going beyond implementation — helping you meet your goals, sharing best practices, and accelerating your growth.

“This was the sixth or seventh software implementation I've been through. The team at our Sage partner was the best I've ever worked with.”

—Morgan Schweitzer, controller,
Lunar Companies
