

Edisoft Merchant QuikPAK

Enterprise Management* Certified Solution

Complementary Solutions

Create a competitive advantage for your business by implementing customized and integrated Enterprise Management* solutions.

Discover the array of possibilities Enterprise Management* complementary solutions offer to match your specific needs.

Edisoft's Merchant QuikPAK software is the ERP integrated warehouse automation solution that supports integration to Enterprise Management* and automates the movement of data within the warehouse process.

Benefits

- Pick and pack with one solution. Gives manufacturers and distributors the advantage of managing Global Supply Chain Operations with one click
- Solve multiple Supply Chain Challenges including eliminating ERP order re-keying throughout the pick, pack and shipment stages, as well as increasing staff productivity and managing product shipments across multiple warehouses

Features

- Automates the movement of data within the following 5 stages of the warehouse process in both single and multiple warehouse environments: 1) Order prioritization, 2) Picking, 3) Packing, 4) Printing and 5) Shipping
- Includes various configurable options for picking, packing and shipping including manual packing, auto packing using a rules based engine, and handheld bar code scanning devices
- Integrated to ProcessWeaver's ECS platform to automate the exchange of Transportation Management data including Small Parcel, LTL, Rate Shopping, Shipping Analytics etc.

Availability

- North America
