

## **Customizing Sage HRMS Part 2: Employee Custom Pages**

### **Questions and Answers from 5/28/2020 Webinar**

How can I find out if I registered already (for free training)?

Either log into [www.sageu.com](http://www.sageu.com) (Sage University) and you should see the class in your registered classes. You can also cut us an email at [sageu@sage.com](mailto:sageu@sage.com) to find out as well

Can you add an attachment to this warning page (Custom page)?

No, you cannot add an attachment to an employee custom page. However, you can add an attachment to the Attachment page and create a reason code that will reference "Warning Custom Detail" or something like that to let you know what page it is referencing.

Can we get a copy of this webinar?

Yes, you can! There will be a recording posted on the registration site. It generally takes about 2-3 weeks to be posted so keep an eye on for it.
