

New York Yankees get **real-time** financial control with Sage

The New York Yankees finance team transformed the back office from a retrospective reporting function into a **strategic partner** enabling real-time decisions across a complex, multi-entity organization.

With Sage Intacct's real-time financial modeling and report generation, the Yankees experienced:

faster month-end close

saved each month on reconciliations

When schedules change and pressure is constant, clear numbers and fast answers keep everything moving. With Sage Intacct, your team can adapt quickly and stay focused on what matters most.

Support instant decisions with real-time transaction dashboards.

Self-service reporting eliminates ad-hoc report requests.

Shift team focus from tedious and manual data entry to strategic analysis.

Provider of the New York Yankees

Why Sage Intacct?

- Continuously consolidate financials and maintain drilldown visibility.
- Digital approval workflows replace paper routing.
- Reduce inter-entity errors and reconciliation time with centralized, automated instructions.
- Review thousands of GL transactions using AI powered outlier detection for higher efficiency and accuracy.

By eliminating manual processes and providing self-service data access, they **freed the team** to focus on long-range planning, scenario modeling, and supporting the business at real-time speed.

By taking advantage of Sage Intacct's time-saving metrics, my team now has the bandwidth to focus on long-term planning. We are no longer perpetually navigating the current year's budget or hustling to close out a month — we're projecting our financials **three, four or five years down the road**. Being able to reallocate our time toward more strategic and thoughtful projects has been **transformative for us.**"

Mike Parker

Executive Director, Financial Operations

Sage Intacct provides our team with information in an immediately presentable format, facilitating more efficient and effective communication with our ownership **so they can make real-time decisions**. It used to take us a day or two to run models. **Now it's immediate.**"

Scott Krug

SVP & CFO
