

Sage Fixed Assets—Tracking

Simplified fixed asset tracking

Easily navigate the many assets you use to run your business.

Sage

The key to accurate and efficient asset management

The fixed assets you use every day to run your business move, require maintenance, and change hands frequently. How do you ensure that everything is accounted for, in good condition, and still worth your investment?

Without proper tracking and management, fixed assets can become a liability and cause inaccurate financial statements—affecting everything from tax reporting to investment decisions.

Enter *Sage Fixed Assets—Tracking*, designed to make the intricate process of asset management not just manageable, but accurate, effortless, and efficient.

Save time and gain visibility

With automated workflows and data input you can save hours of manual work, know the precise status and value of assets, and foster interdepartmental transparency and collaboration. This, in turn, can help improve customer service, safety, boost the return on your investments, increase revenue, and ultimately lead to better business outcomes.

Tracking your assets has never been simpler

A comprehensive view of your assets

Sage Fixed Assets—Tracking integrates seamlessly with the entire Sage Fixed Assets Suite—Depreciation, Planning, and Reporting—to give your organization a streamlined, transparent, and intuitive view into the status and location of all your assets across their entire lifecycle.

The gold standard for accurate tracking

Sage Fixed Assets sets the standard in fixed asset management, renowned for its unmatched accuracy. Tracking has intuitive wizards to ensure nothing is overlooked. By streamlining inventory tasks, Tracking removes friction from the entire process—giving your team time back in their day. It makes taking inventory faster and more efficiently, removing complexity and hassle and inspiring more regularly which can have a direct impact on tax liabilities and insurance.

A single source of truth across departments

Our new Asset Maintenance feature in Sage Fixed Assets—Tracking helps modernize your operations and improve your bottom line by centralizing asset management and creating a single source of truth. Asset Maintenance fosters communication across departments—putting an end to siloed spreadsheets and the headaches they create—and connecting your accounting and maintenance teams like never before to create visibility throughout the entire lifespan of your assets. Now you can make more informed decisions and pivot your strategies to get the best return on your investments.

Say good-bye to manual reconciliation

Any changes you make in Tracking are synced seamlessly to Depreciation. So, no double entries or errors!

Quick and efficient inventories

Sage Fixed Assets—Tracking along with our free Scanner app make inventory management easier and more efficient. Use any Android OS-based mobile device of your choice*. Our Scanner app works with any handheld Android OS-based device to scan most barcode types, including QR codes*.

***Note:** See [system requirements](#) and helpful links to [third-party hand-held scanners and labels](#) on our website. Talk to a Sage Fixed Assets representative for additional label options.

- Wirelessly scan your physical assets' barcode tags and send data directly to Sage Fixed Assets—Tracking.
- Conduct inventories across multiple locations at the same time—ensuring all your assets across sites are accounted for.
- Enter or edit asset details like description, location, condition, and serial number.
- Control data entry, your way—with over 50 fully customizable fields!
- Add assets and attach images right from the Scanner App.
- Reconcile the status of your assets—like missing, lost, or stolen goods—against your current asset ledger.
- Easily create visibility across your business and report on all the crucial data you need to keep track of your fixed assets—including transfers, inventory exceptions, and duplicate tags.
- Define security profiles for individual users to ensure only those allowed to change the data are able to.
- Check assets in and out to easily keep track of who has which item, receive alerts when checked out assets are overdue, and see the history associated with each asset.
