

Sage Timeslips Premium

The leading time tracking and billing solution for attorneys, accountants, and consultants.

Timeslips works across many industries. It's built for any business needing to accurately and efficiently capture their time, deliver professional, personalized invoices to their clients, and get paid quickly.

“I don't know any other way I would handle time and billing. The database is incredible—just invaluable. Everything I need to know is there, and I can quickly go to it. It's so fast.”

Jacques LeFore, President
LeFore Consulting

Recognized as a top solution by Professional Services associations and publications:

- American Bar Association (ABA) Premium Service Provider
- The New York Law Journal
- CPA Technology Advisor
- New Jersey Law Journal
- The Recorder—“Best of” List
- Texas Lawyer (Hall of Fame)

Sage

Fast. Flexible. Scalable. Powerful.

Sage Timeslips Premium is most famous for its fast and efficient reporting and billing engine. Database size and concurrent user capacity are limitless which means you can start small and be confident that Timeslips can grow with you at your pace. With almost unlimited ways to customize the way you work, Timeslips flexes to the way you work so you can spend less time and effort on non-billable tasks and more on creating customer delight and increasing profits.

Get going in under 30 minutes

Set up is quick and easy. Build your client database and start billing and reporting in under 30 minutes!

Flexible billing that works—for you and your clients

Use client-based billing arrangements, rate allocation, discounts, and adjustments to tailor your services for each client. Take advantage of our QuickBill feature to create and manage slips, print, and email to your clients—all from one location.

Professional invoices that get you paid faster

Create invoices tailored to each client that make it easy for them to pay you faster. Drop in your logo, add and remove fields, change fonts, and reorder sections to get the look you and your clients want.

Best of all, the design displayed on the screen is what the printed bill will look like, so there are no surprises.

Robust reporting with one click

Use any of our 140+ pre-installed report templates to get a real-time view of your profitability, productivity, clients, and more.

Or drag-and-drop to create reports and visual graphs tailored to your business—like slips, clients, timekeepers, tasks, expenses, and transactions. Print to Microsoft® Excel or Word to easily share with stakeholders.

Get relevant and actionable insights

Quickly create personalized interactive dashboards to identify the key business indicators that you can action to move your business forward—like slip totals, budget figures, accounts receivable transactions, and account balances. Need to hone in on just specific data? Easily design your own Timeslips control panel for instant access to only the most relevant data.

Integrate with solutions and apps you're already using

Timeslips syncs seamlessly with the tools you're already using in your business—including end-to-end solutions that lack robust reporting and billing features, as well as many popular applications like QuickBooks®, Sage 50cloud®, and AffiniPay® (CPACharge®, ClientPay®, and LawPay®). Together, these tools extend the power of Timeslips—so you can streamline processes, increase efficiency, and save time.

Run your business—from anywhere and on any device

With our online time and expense tracking portal, Sage Timeslips eCenter, there's no need to wait until you're back at your desk to record time, tasks, and expenses—or even start a file on a new client. eCenter creates slips in real-time over the web or on your mobile device using any browser and links directly to your Timeslips desktop app. You can even give your clients direct access to review their accounts.

“The biggest benefit is that it allows us to accurately track our hours and costs for each project. This allows us to predict hours and costs on future projects and, most importantly, improve workflow for our company.”

James Hundt, CEO
Foresight Architects

Sage
