

Sage Inventory Advisor

Complementary Solutions

Create a competitive advantage for your business by implementing customized and integrated Sage X3 solutions.

Discover the array of possibilities Sage X3 complementary solutions offer to match your specific needs.

Sage Inventory Advisor is an affordable cloud solution that helps companies reduce excess inventory and working capital, while eliminating stock-outs. It connects to Sage ERP data to deliver real-time health-checks on the inventory that impacts the bottom line, reduce the time spent on forecasts, and resolve the optimal investment required to achieve target fill rates. A Web and mobile solution, Sage Inventory Advisor is easy to use and slashes time spent on forecasts and ordering. It can be implemented cost effectively and used in just hours.

Benefits

- Reduce excess inventory by 10%–15% and improve inventory turns
- Reduce working capital and free up 15%–20% of cash tied into inventory
- Improve fill rates by 2%–10% and eliminate stock-outs
- Reduce time spent on forecasting by as much as 50%

Features

- User Interface—Easy-to-use web and mobile interface uses standard browser behavior with contextual information display for clarity
- Dashboard—Provides visibility to critical KPI's and allows drilldown to data details
- Inventory Forecasting—Dynamic, graphical forecast engine assists user in forecasting and planning for future replenishment orders
- Inventory Monitoring—early warning of (potential) stock-outs or surplus orders
- Classification Matrix—Classifies items into color-coded categories based on calculated metrics such as velocity, quantity sold/consumed, and value of sales/consumption, allowing users to rapidly identify and focus on important items
