

# Sage Enterprise Intelligence

## Complementary Solutions

Create a competitive advantage for your business by implementing customized and integrated Sage X3 solutions.

Discover the array of possibilities Sage X3 complementary solutions offer to match your specific needs.

Sage Enterprise Intelligence is an intuitive business intelligence solution integrated with your Sage business management system to help business users reduce time spent on analysis and reporting and make faster, better-informed decisions. It empowers all users with a simple solution to access and analyze data in a self-sufficient manner, which eliminates the need for disparate tools and specialized skills, and can reduce time to decision.

## Benefits

- **Easy:** Empower users to analyze and report on information on a self-service manner, by providing them with an intuitive, easy-to-use Business Intelligence solution
- **Fast:** Reduce time spent on analysis and reporting and enable a faster and better-informed decision-making in your organization, by providing users with a quick access to information
- **Comprehensive:** Get a clear picture of your whole business and develop collaboration across departments. The tight and secure integration with Sage X3 ensures the reliability of critical business information, provides business users with coherent insight on real-time enterprise data, supports coherent decision-making and fosters continuous cross functional improvement.
